DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
It does not identify the citizenship of each inventor.

The citizenship of inventor Eberhard Taeger is missing.

Drawings

3. The drawings are objected to because Figures 2A, 2B, 2C and 2D should be separately labelled. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: Appropriate headings should be used throughout the instant specification. There should also be a brief description of the drawings (Figures 2A, 2B, 2C and 2D).

Appropriate correction is required.

Art Unit: 1732

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1: line 17, - - and - - should be inserted before ``inorganic'' (for proper Markush format); line 20, ``or'' should be - - and - - (for proper Markush format).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

8. Claims 1-3, 5, 9, 13 and 14 are rejected under 35 U.S.C. 102(a) as being anticipated by Vorbach et al (article titled ``Properties of carbon filled cellulose filaments'').

Vorbach et al (see the entire document, in particular, page 120, column 1; page 120, column 3 (under ``Conductive cellulose filaments by the lyocell process'') to page 122, column 3) teach a process of making molded parts (e.g., bicomponent fibers) as

Art Unit: 1732

set forth in the instant claims, including the use of two polymer solutions, at least one of which contains an additive (e.g., conductive carbon), simultaneously extruding the polymer solutions and coagulating/precipitating to form molded parts.

Allowable Subject Matter

9. Claims 4, 6-8 and 10-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
